Product Showcase 2026

In partnership with

World Leading

Personal protection
solution manufacturer

Who we are

For over 30 years Globus has been protecting people in industry and healthcare. We put people at the centre of everything we do. Our products are essential to our customers and enable them to work safely and give their best performance. We provide high-quality health and safety solutions across a broad spectrum of industries. Our long-term goal is to be the first choice for safety worldwide.

Our employees and customers are at the heart of our company. Our flexibility and ability to adapt quickly enables us to deliver innovative solutions of the highest quality to meet their needs.

What we do

Globus is one of the world's leading manufacturers of global worker safety solutions for hand, eye, head, hearing, respiratory protection as well as protective clothing. With a unique style and identity, our solutions are customised and built upon the cornerstones of protection, wearability compliance, and productivity.

Respiratory protection

Globus respiratory range offers exceptional quality. We have a selection of products with levels of protection against airborne particles such as dust, fumes and viruses, protecting your workforce in various environments.

The disposable respirators have achieved excellent Face Fit test pass rates and have constantly outperformed competitor products when undergoing fit testing.

Respiratory Protection

ALPHA
SOLWAY

2530V™

RESPIRATORY PROTECTION

P3V premium disposable cup-shape respirator

Features:

- Lightweight, cup shaped respirator
- Low profile exhalation valve to reduce heat and moisture build up
- Four point headstrap adjustment
- Preformed nosebridge with additional non-ferrous nose clip for a secure fit
- Features a full foam inner face seal for comfortable secure fit
- Conforms to EN 149:2001+A1:2009 FFP3 NR

Suitable Applications:

- Manufacture of batteries
- Construction
- Infection control
- Metalworking
- Mining
- Pharmaceutical industry
- Ship building/repair
- Underground civil engineering
- Disposal of waste
- Woodworking industry

SKYTEC

Alpha Sentinel
Full Mask™

RESPIRATORY PROTECTION

Alpha Sentinel Full Face Masks are ergonomically designed for optimum protection, comfort and PPE compatibility

Features:

- The five-point adjustable head harness removes the feeling of a downward pull, ensuring a balanced, comfortable fit
- Well-balanced, lightweight (600g)
- Available in three sizes for a more tailored fit, increasing respirator/fit factor
- Raised visor bridge profile protects the visor from scratches when not in use
- Visor and filter position provides panoramic field of view without any obstructions
- Low profile shape provides exceptional compatibility with other PPE
- The Alpha Sentinel filters are fitted with a simple connection which easily clicks into position
- The large exhalation valve reduces heat and moisture build-up, providing low breathing resistance

CAT II

Respiratory Protection

Alpha Sentinel Half Mask™

RESPIRATORY PROTECTION

Alpha Sentinel Half Face Masks are ergonomically designed for optimum protection, comfort and PPE compatibility

Features:

- Well-balanced and light weight (140g), providing optimum wearer comfort
- Available in 3 sizes creating a tailored fit profile, superb fit and comfort for any workforce
- Fully adjustable head harness, offering easy fitting and adjustment, with a robust and trusted fit when in use
- Low profile shape to maximise the field of vision and allow exceptional compatibility with other PPE
- Sentinel filters are fitted with a simple connection which easily click into position
- Premium quality elastic strap provides a secure high comfort fit and retains mask positioning
- The large exhalation valve reduces heat and moisture build up, providing low breathing resistance
- Easily cleaned and maintained with spare parts available
- Quantitative face fit adapter available
- Respirators are supplied with user seal check covers, which double as particulate retainers for combination filter

Introducing

Sentinel

Powered Air Respirator System

The Skytec Sentinel Powered Air Purifying Respirator (PAPR) focuses on user comfort, intuitive operation, and high performance. Engineered to enhance both mobility and protection, the Sentinel PAPR range prioritises an ergonomic design, modular flexibility, and user-friendly controls to deliver a seamless experience across diverse working environments.

Enhancing protection and comfort for:

Food & Beverage

Agriculture

Surface Preparation & Paint Spraying

Woodworking

Metalworking

Chemical industries

Utilities

Silica Dust

Construction & Demolition

Medical & Healthcare

Pharma

Transportation, Highways & Infrastructure

Comfort, intuitive operation and high performance protection

Ball and socket hose connector
allows the hose to pivot in multiple directions

Visual, vibration and audible alarms
alerts users through multiple senses for prompt notice of warnings

Recessed hose connection
minimises snagging and enhances durability

Simple display and intuitive functionality
adjust settings quickly without interrupting workflow

Dual filter configuration
increases filtration for longer protection and airflow

Filter stop
ensures correct fitting and stops over tightening

Range of filters and pre filter
Pre filter extends filter life by capturing larger particles

4 airflow speeds for adjustable comfort
based on activity or environment

USB-C charging
fast, hassle-free charging

Hand protection

The Globus hand protection portfolio comprises some of the most technologically advanced protective gloves in the industry. It contains products designed for the most complex and hazardous of tasks, offering appropriate levels of protection.

Selecting the right protective glove that is fit for the task, hazard and user is crucial. Our team of hand protection specialists can work alongside you to deploy the Globus hand protection programme, enabling a tailored solution that works perfectly for your business.

Hand Protection

SKYTEC CH402™

CHEMICAL PROTECTION

Flocklined chloroprene chemical resistant glove with an embossed grip

Features:

- Chloroprene protects against a wide variety of chemicals including acids, caustics, solvents, grease and oil
- Honeycomb finish on palm enhances grip properties in all conditions
- Flocklined for extra comfort and sweat absorption
- Impermeable for working in damp or oily environments
- Forearm well protected
- Length: 30cm
- Thickness: 0.75mm

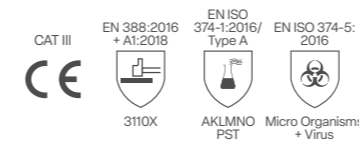

Suitable Applications:

- Chemical handling and containment
- Fossil fuel extraction and refining
- Handling wet oily or greasy materials

Codes

7/S	SKG00074BD	8/M	SKG00074BF
9/L	SKG00074BH	10/XL	SKG00074BJ
11/2XL	SKG00074BL		

SKYTEC CH601™

CHEMICAL PROTECTION

Unlined nitrile glove with hydrophobic PVA layer

Features:

- Advanced outer PVA layer protects from Ketones, diluted solvents, aliphatic, aromatic hydrocarbons
- Inner nitrile layer for enhanced chemical protection
- The combination of both material offers outstanding protection against Acetone, MEK, Toluene, acetonitriles
- Anatomically shaped fingers providing superior comfort leading to less fatigue
- Low thickness allows higher dexterity and excellent tactility
- Excellent alternative to Butyl glove against many harmful chemicals
- Provides anti-static properties
- Limited protection in contact with water or water-based chemicals

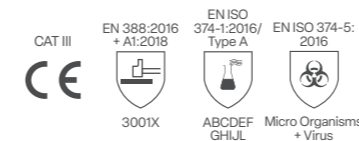

Suitable Applications:

- Acetones and ketones
- Aircraft and airfield operations
- Chemical handling and containment
- Electrical engineering and maintenance

Codes

Hand Protection

SKYTEC CH202™

 CHEMICAL PROTECTION

Heavyweight long nitrile glove with textured finish

Features:

- Soft and flexible nitrile
- Nitrile protects from oils, hydrocarbons and grease penetration
- Sand patch finish allows secure handling in wet and dry conditions
- Unlined to reduce risk of lint contamination
- Embossed with the size for ease of pairing after laundering
- Long cuff to protect the forearm and upper arm from chemical projections
- Chlorinated to ease donning and doffing
- Length: 48cm

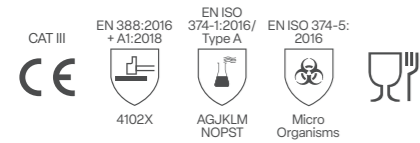

Suitable Applications:

- Chemical handling and containment
- Component and product assembly
- Painting and finishing

Codes

Hand Protection

SKYTEC CH102™

 CHEMICAL PROTECTION

Durable, oil-resistant, triple-dipped PVC glove with extended cuff

Features:

- A flexible, soft glove that absorbs perspiration, for ultra comfortable extended wear and with good mechanical resistance
- Seals and protects the hand against chemicals while remaining flexible
- Impermeable for working in damp or greasy environments, enabling you to grip objects securely
- Excellent abrasion resistance (EN388 Level 4)
- Surface provides tactile feel and better grip
- Designed for easy movement and continuous wear
- No irritation by seams in contact with the skin

Suitable Applications:

- Acids
- Chemical handling and containment
- Commercial fishing
- Drain clearance and repair
- Vehicle repairs and maintenance

Codes

SKYTEC CH201™

 CHEMICAL PROTECTION

Nitrile ESD unlined glove with textured finish

Features:

- Soft and flexible nitrile
- Specially formulated glove to dissipate static charge, complies with EN 16350:2014
- Free from external conductive connections and adjustment systems
- Anti-slip pattern for good grip in wet and dry conditions
- Unlined to reduce risk of lint contamination
- Resistant to a wide variety of chemicals and solvents
- Straight cuff
- Length:30cm

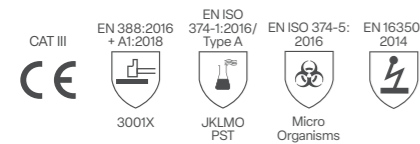

Suitable Applications:

- Acids
- Chemical handling and containment
- Painting and finishing

Codes

Hand Protection

SKYTEC Teal™

 DISPOSABLE PROTECTION

Single use 100% nitrile powder free glove

Features:

- 100% premium quality nitrile
- Palm thickness 0.12mm (5 mil) / Weight: 6g (size M)
- High resistance to penetration and projections of many chemicals
- Chlorinated inside to offer more comfort and reduce friction when donning
- Powder-free, latex free, non-sterile, AQL 1.5
- Approved for food handling
- Silicone free to allow usage in bonding / painting operations (paints, coatings, primers, adhesive)
- Medical device compliant (MDD 93/42/EEC), conforms to EN455 (all parts)

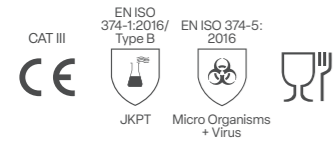

Suitable Applications:

- Component and product assembly
- Chemical handling and containment
- Food preparation and handling
- Laboratory analysis

Codes

Hand Protection

SKYTEC TX630™

 DISPOSABLE PROTECTION

Anti-static single-use glove made of 100% nitrile, silicone free

Features:

- High resistance to penetration and projections of many chemicals
- Palm thickness 0.16mm (6 mil), weight: 9.1g (size M), Length: 300mm, AQL 1.5
- Textured finish on fingertips to enhance grip
- Powder-free, silicone and latex-free, non-sterile
- Double Chlorinated inside & outside to offer increased comfort, low tack, and reduce friction when donning
- Eliminates static charge build-up to help prevent sparks & flare-ups in flammable environments
- Extended cuff (300mm length) to protect the forearm

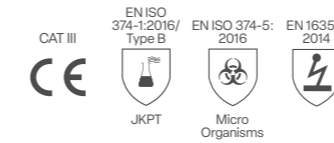

Suitable Applications:

- Component and product assembly
- Chemical handling and containment

Codes

SKYTEC TX424™

 DISPOSABLE PROTECTION

Dual certified thin nitrile glove

Features:

- High quality nitrile, soft and durable
- Palm thickness 0.10mm (4 mil), weight: 5g (size M), Length: 240mm
- Textured finish on fingertips for improved grip and touch
- Powder free, latex free, non sterile, AQL 1.5
- Chlorinated inside to offer more comfort and reduce friction when donning
- Nitrile has antistatic properties
- Approved for food handling
- High resistance to penetration and projections of many chemicals

Suitable Applications:

- Component and product assembly
- Vehicle repairs and maintenance
- Chemical handling and containment
- Food preparation and handling
- Examination
- Laboratory analysis

SKYTEC TX925™

 DISPOSABLE PROTECTION

Orange single use glove with patented grip pattern

Features:

- High quality nitrile, soft and durable
- Palm thickness 0.23mm (9 mil), weight: 8.5g (size M), Length: 240mm
- High resistance to penetration and projections of many chemicals
- Diamond grip pattern technology on both side offering outstanding grip properties in all conditions
- Powder-free, latex free, non-sterile, AQL 1.5
- Chlorinated inside to offer more comfort and reduce friction when donning
- Antistatic properties due to inherent antistatic properties of nitrile
- Lasts up to 5 times longer than regular single use gloves in industrial applications

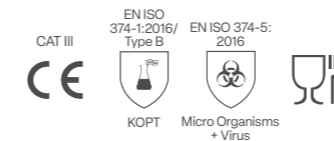

Suitable Applications:

- Chemical handling and containment
- Handling wet oily or greasy materials
- Inspection and quality control
- Machinery and plant operation
- Vehicle repairs and maintenance

GLOBUS

Innovative, sustainable safety solutions.

SKYTEC™

Made to perform.

Eye protection

Eye protection is vital to guard against injuries which occur in environments that have a high risk of flying particles, scratches, abrasions and foreign bodies entering the eye.

As a leader in performance eyewear, we have a full portfolio of frames with protection that is second to none, incorporating traditional shapes and reinventing them with a modern edge.

Engineered using the latest safety lens and frame technology, innovative designs and unique performance features, our eye protection is suited to a wide range of applications, ensuring the wearer stays protected when operating in hazardous areas, with comfort as standard.

Our offer of distinctly contemporary, yet robust prescription and non-prescription eyewear from Riley is structured to withstand the harshest of industrial environments.

Eye Protection

RILEY Stream™ Evo Eco

SAFETY GLASSES

Stream™ Evo Eco safety glasses provide extreme comfort and wearability with a range of lens options to suit a variety of conditions

Features:

- Single wraparound polycarbonate lens
- Soft, ventilated TempFLEX™ temple tips provide a comfortable, secure fit
- Slim temples enhance comfort when worn with ear defenders
- Lateral protection
- 100% metal free
- Soft, adjustable, anti-slip nose bridge
- Supplied with a microfibre storage pouch
- Stream Evo Accessory Pack available separately
- Contains adjustable headband and gasket
- Also available in a smaller size – see the Stream Evo Small range
- No single use packaging, supplied in a microfibre pouch made from 100% recycled material

Reon™

FACE SHIELD

Adjustable face shield rated for high energy impacts

Features:

- Fitted chinguard
- Ratchet adjustment allows for a secure fit to a range of head sizes
- Padded headband for a comfortable fit
- Adjustable pivot for wearer to select optimum angle
- Frameless design for a wide, unrestricted field of vision
- Simple, cost-efficient visor replacement system
- Level A impact resistance - the highest attainable level under EN166

Further information:

The Reon face shield provides the wearer with 'Class A' face protection. High energy impact resistance to EN 166 'Level A' means that the face shield protects against impacts up to 190m/s (425mph). REON also outperforms for comfort & vision clarity. **Note** that browguard and faceshield must be purchased separately.

Hearing protection

The Globus hearing protection portfolio includes ear defenders and earplugs with different levels of attenuation to satisfy the protection needs of all applications and environments where hearing protection is required, from low-level to high-level attenuation.

The whole range of our hearing equipment is designed with comfort and ergonomic in mind and comply to the most updated standard EN 352.

The Skytec range includes the most stylish, lightweight and excellent-fitting earmuffs, with disposable and reusable earplugs.

SKYTEC 3017 Free™

EAR DEFENDERS

Helmet mounted ear defenders

Features:

- Style code: 3017 (FREE)
- Helmet mounted type ear defenders
- Compatible with Helmet models RADIUS and ROCKMAN (all variations)
- Height adjustable cups for a perfect fit
- Soft ear pads
- Spare parts available
- Colour options: Black cup / Orange ring / Black arms | Orange Cup / Black ring / Black arms
- Made in Germany

Suitable Applications:

- Aircraft and airfield operations
- Highway repairs and maintenance
- Masonry and brickwork
- Demolition
- Fossil fuel extraction and refining
- Forestry

Protective clothing

Chemical clothing is designed to reduce the risk of chemical exposure to the body. Fit can vary for the type of application and risk required.

Our bespoke protective clothing can be donned for the majority of high-risk operations across industry and healthcare, or tailor-made for individuals, with each model setting new benchmarks in quality and performance.

Our bespoke protective clothing service allows you to design custom-built clothing to meet your specific safety requirements. Our range caters for all needs with a selection of full-body suits, jackets, aprons, sleeves, splash hoods and much more.

Protective Clothing

SKYTEC™ FR10123™

CHEM FR BOILERSUIT

Chem FR Boilersuit with hood and elasticated inner wrists and ankles and reflective strips

Features:

- Offers protection against heat, flame and electrostatic hazards
- Double cuff system with internal elasticated wrist and velcro fastening on the outer for added protection
- Thumb loop for enhanced protection
- Double layer ankle design with inner elastication and velcro fastening on the outer for enhanced security
- Double storm facing covering the zip protecting the wearer
- Full Face Mask (RPE) compatible hood with neck flap to offer enhanced protection for the neck
- Ring-pull zip for easy donning and doffing when wearing gloves
- Reflective tape enhances visibility

Suitable Industries:

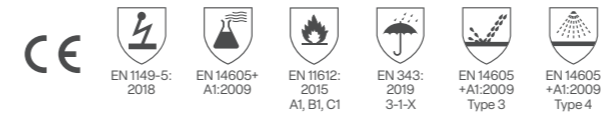

- Oil and gas
- Utilities
- Waste and recycling

Code breakdown

Helping you to understand the product codes

Chem FR boiler suit with hood, elasticated double wrist, elasticated ankle, reflective tape

Guide to EN standards

European Norm (EN) standards for Personal Protective Equipment (PPE) are mandatory safety requirements ensuring products meet specific risk-reduction criteria, marked with CE (or UKCA) compliance.

 <p>CE Category European regulation 2016/425 (EU)</p> <p>CAT II Reversible Risks (injury), certified compliant by a notified body.</p> <p>CAT III Irreversible Risks certified compliant by a notified body. Also subject to ongoing surveillance by a notified body whose number is specified.</p>	 <p>EN 388 Mechanical risks</p> <p>EN 388 is the European standard (EN 388:2016+A1:2018) for protective gloves against mechanical risks, mandatory for selling safety gloves in Europe. It rates gloves on a scale for abrasion, cut, tear, and puncture resistance, typically shown as a four-digit code, plus optional letters for high-level cut (A-F) and impact protection.</p>	 <p>EN 16350:2014 Electrostatic properties</p> <p>In industrial settings where explosive gases, vapors, or dusts are present, even a small electrostatic discharge can trigger a fire or explosion. EN 16350:2014 sets the criteria for gloves that help prevent such risks by safely dissipating static electricity.</p>	 <p>EN 14605:2005 +A1:2009 Liquid tight</p> <p>Protective clothing against liquid chemicals. Clothing with liquid-tight connections</p> <p>Type 3 (Liquid-Tight Clothing) Protects against liquid chemicals that are applied under pressure. Ensures liquid-tight seams to prevent liquids from penetrating the suit under high pressure.</p>	 <p>EN 14605:2005 +A1:2009 Spray tight</p> <p>Protective clothing against liquid chemicals. Clothing with spray-tight connections.</p> <p>Type 4 (Spray-Tight Clothing) Protects against liquid chemicals in the form of sprays or aerosols. Ensures spray-tight seams to prevent liquid aerosols or low-pressure sprays from entering the suit.</p>	 <p>EN 13034:2005 +A1:2009 Liquid chemicals</p> <p>Potential exposure to small quantities of fine spray/mist or accidental low volume splashes and where wearers are able to take timely adequate action in case of contamination. This standard covers Type 6 protective clothing, which offers limited protection against liquid chemicals.</p>
 <p>EN 407:2020 Heat-related risks</p> <p>EN 407:2020 is the updated European standard specifying performance requirements and test methods for protective gloves against thermal risks, including fire, contact heat, convective heat, radiant heat, and molten metal</p>	 <p>EN 511:2006 Cold-related risks</p> <p>EN 511:2006 is the European standard for protective gloves against convective/conductive cold (down to -50°C) and water penetration, marked by a shield icon with a snowflake and three digits. It tests for convective cold, contact cold, and water impermeability.</p>	 <p>EN ISO 374-1:2016 Resistance to chemical permeation</p> <p>Is the European safety standard governing protective gloves against dangerous chemicals and microorganisms. It requires testing for penetration and permeation against a list of 18 specific chemicals, classifying gloves into Type A, B, or C based on performance levels and the number of chemicals they resist.</p>	 <p>EN ISO 13982-1:2004 +A1:2010 Solid particulates</p> <p>Protective clothing against solid-airborne particulates.</p> <p>Type 5-B (Biological Protection) If the protective clothing also provides protection against biological hazards, it can be marked as Type 5-B. The 'B' marking indicates that the suit offers both particulate protection and biological protection.</p>	 <p>EN ISO 11612:2015 Heat/flame-related risks</p> <p>Performance requirements for clothing designed to protect against a range of heat and flame hazards, including radiant heat, convective heat, molten metal splash, and contact heat. It applies to workers in environments with a risk of exposure to significant heat and flame hazards (e.g., firefighters, welders, metal workers).</p>	 <p>EN 14605 + A1:2009 Liquid chemicals</p> <p>Requirements for protective clothing against liquid chemicals. It specifically covers both liquid-tight (Type 3) and spray-tight (Type 4) chemical protective suits. There are 6 types of chemical protective clothing, classified based on the level of exposure risk. Type 1 offers the highest level of protection, while Type 6 provides the lowest.</p>
 <p>EN 407:2004 Heat-related risks</p> <p>Is the updated European standard specifying performance requirements and test methods for protective gloves against thermal risks, including fire, contact heat, convective heat, radiant heat, and molten metal.</p>	 <p>EN ISO 374-5:2016 Protection against micro-organisms</p> <p>Is a European standard specifying performance requirements and test methods for protective gloves designed to protect against microorganisms (bacteria, fungi, and viruses). It focuses on resistance to penetration (air/water leaks).</p>	 <p>ANSI/ISEA 105 Mechanical, chemical & thermal risks</p> <p>is the North American standard for classifying the performance of protective gloves and sleeves against mechanical, chemical, and thermal hazards. It uses a 9-level scale (A1-A9) to measure cut resistance, alongside rankings for abrasion and puncture resistance.</p>	 <p>EN 343:2019 Protection against weather (rain)</p> <p>A European norm that specifies the requirements for protective clothing, particularly focusing on protection against rain, snow, fog, and ground humidity. This standard ensures that clothing provides adequate protection from wet and cold conditions in outdoor environments.</p>		
 <p>EN 421:2010 Radioactive contamination</p> <p>Specifies performance requirements and testing for protective gloves against ionizing radiation and radioactive contamination. It applies to gloves, arm/shoulder protection.</p> <p>Note: It does not apply to X-ray.</p>	 <p>FOOD SAFE Food contact risks</p> <p>It is applied to materials and articles that, at finished state, are intended to come into contact or are brought into contact with foodstuffs or with water that is for human consumption.</p>	 <p>MD MEDICAL DEVICE EN 455 Contamination risks</p> <p>Is the European standard for single-use medical gloves, ensuring they protect patients and users from contamination. It requires testing for freedom from holes, physical properties (strength, dimensions), biological safety (skin irritation, protein levels), and shelf life. It is crucial for medical, dental, and examination settings.</p>
